LET ME INTRODUCE MYSELF

Hi Everyone, I am Prashant Singh from Meerut, Uttar Pradesh, India
Currently I am working as a Application Developer at IIIT Bangalore.

I AM A QUICK LEARNER AND FLEXIBLE PERSON, WHO IS KEEN TO LEARN AND WORK WITH NEW TECHNOLOGIES AND USE MY SKILLS AND EFFORTS TO MAKE AN IMPACT.

I fell in love with programming while i was doing my engineering , I am fluent in classics like HTML, CSS, JAVA, Angular, Android Applications and JavaScript. My current focus is on React Native and Mobile Apps. Whenever possible, I also apply my passion for developing products with Modern JavaScript Frameworks like Node.js and React.js

I am passionate about building excellent software that improves the lives of those around me. I specialize in creating software for clients ranging from individuals and small-businesses all the way to large enterprise corporations.

- **B.Tech. (Computer Science and Engineering)**

Lovely Professional University, Phagwara

What I can do for you

05

FULL STACK DEVELOPMENT

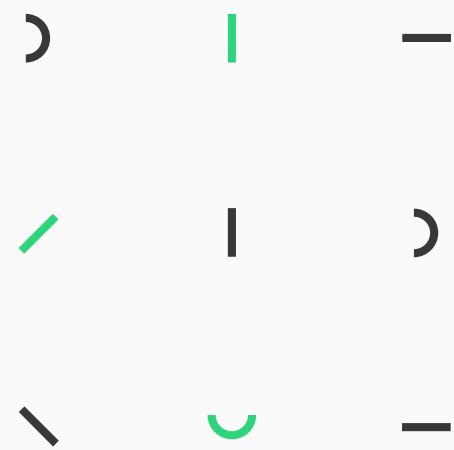

It refers to the development of both front end(client side) and back end(server side) portions of web application.

UI/UX

A UI, UX, and front-end web developer is responsible for applying interactive and visual design principles on websites and web applications for a positive and cohesive user experience

ANDROID SOFTWARE DEVELOPMENT

Android software development is the process by which applications are created for devices running the Android operating system. Google states that "Android apps can be written using Kotlin, Java, and C++ languages" using the Android software development kit (SDK), while using other languages is also possible.

How I work on a daily basis/ How I work on my Projects

01. RESEARCH

Understand the subject matter completely and build on the knowledge related to it, becoming intimately familiar with the subject matter. Determine methods to address the specific needs and requirements.

02. DESIGN

Misleadingly thought of as the superficial appearance of a product, design actually encompasses a lot more. It is a cross functional process that includes market research, technical research, design of a concept, and prototype mockup.

03. DEVELOP

Findings from the research and design phases are utilized for the production of specific products including materials, systems, and methods. Engineer utilizing the research and designs to produce commercial products for the customer.

Certifications

DIGITAL MARKETING FROM INTERNSHALA (06/2019 - 07/2019)
